

# YOUR HEALTH COMES FIRST

## PEDIATRICS

### *Pediatrics Clinic*

Pediatrics is the area inside Medyca that dedicates to the care and disease treatment of children and teenagers. This clinic focuses on the minor from the moment of his birth to adolescence. The importance of this area relies on the care and medical attention of the growth, maturation and the biological, physiological and social development that will determine the way the child and teenager will develop.

### *General Services*

- Healthy children control.  
(Preventive Pediatrics)
