

YOUR HEALTH COMES FIRST

UNIDENT

The Power Of A Healthy Smile

Health begins with the mouth, since it is important to have good oral health where good hygiene and chewing are considered. Oral health is widely related to other areas of our health, which is why periodic checkups are so important, as well as timely care to prevent alterations that can lead to the loss of teeth and changes in the dental apparatus.

At Unident, we have certified dentists that own a wide experience, as well as a group of specialists in all the odontological areas.

Why is oral health important?

- Oral health helps prevent diseases.
- Healthy gums keep teeth healthy.
- A balanced occlusion keeps a healthy chewing.
- Good positioned teeth help avoid diseases.
- A cavity free mouth prevents the loss of dental pieces.
- Periodic checkups prevent maxillofacial pathologies.
- Dental aesthetics improves self-esteem.
